

SCHEDULED FOR FIRST QUARTER 2006
bmp TC Powerline Atlas 2006 (vol. III)

a compact analysis
&
worldwide snapshot of PLC activities
by leading international strategy consultants
involved in numerous Powerline Projects since 1996 and Broadband Access since 1993

Powerline Communications (known also as PLC, BPL-Broadband Powerline or CPL-Courant Porteur en Ligne) has been labeled dead several times, yet today there are diversified activities on a worldwide basis. The Powerline market remains quite intransparent due to the differences in approaches and positioning as well as the varying frame conditions for Powerline deployments.

bmp TC is offering a compact information resource with international analysis and market data. The **bmp TC Powerline Atlas 2006** provides an updated and detailed, yet compact overview of the worldwide Powerline local loop activities and players. Accordingly the reader is able to quickly assess the technological roadmap, the potential supply sources and the worldwide scope of Powerline activities. International deployments are highlighted with key information such as location, utility and strategic partners, source of hardware, number of users and passed households.

Now in its third year we have incorporated feedback from users of the PLC Atlas to include easier comparison with previous years. This way an analysis of the evolution of the industry is enabled.

Benefits:

- Contains 20+ pages analysis regarding technology, business model, supplier side...
- Evolution 2004-2006
- Detailed market data (regional overviews, detailed project descriptions including utility, location, coverage & subscribers, technology and strategic partners...) with nine figures.
- Track down projects by country or by manufacturer
- Identify potential suppliers (over 20 mini-dossiers of PLC suppliers)
- Be up to date: Only contains active projects (and a few key projects just stopped or about to launch)
- Quickly assess the scope of worldwide / regional / national activities, the size of the market and the involved players

Sample project details

City	<u>Mannheim</u>		
Utility	MVV Energie AG	Start of Project	July 2001
Project Type	Commercial	Households in the City	120000
Commercial Name	Vype	Target for passed households	120000
Website	www.vype.de	Target for users	20000
Operator / ISP	Vype	Households passed	85000
Strategic Partners	Power PLUS Communications, Gira (indoor)	Users	5000
		<u>Integrators</u>	
		MAIN.NET	-
Topology / Backhaul fiber		-	-
Services beyond Internet Access: Security Camera, VoIP, substation monitoring			
		<u>Comments</u>	
		-	-

Table of contents

TABLE OF FIGURES	4
1. INTRODUCTORY WORDS BY NADINE BEREZAK-LAZARUS, MANAGING DIRECTOR, BMP TC	5
2. BRIEF TECHNOLOGY INTRODUCTION	8
3. SUPPLIERS' MARKET	10
4. MARKET FRAMEWORK CONDITIONS AND BUSINESS MODEL KEY ISSUES	14
4.1. Cost and business plan	14
4.2. Value chain and the role of the utility	17
4.3. Regulatory and standardization landscape.....	19
4.4. Services enabled.....	22
5. MARKET EVOLUTION AND REGIONAL ANALYSIS	23
5.1. Asia.....	24
5.2. Africa / Middle East	26
5.3. Europe	27
5.4. North America	32
5.5. South America.....	36
6. DETAILED PROJECT OVERVIEW	37
6.1. Asia.....	37
6.2. Africa / Middle East	44
6.3. Europe	49
6.4. North America	82
6.5. South America.....	107
7. PLC INTEGRATORS	113
CURRICULUM VITAE NADINE BEREZAK-LAZARUS, MANAGING DIRECTOR	113
REFERENCES OF BMP TC	129
LIST OF ABBREVIATIONS	130
LINKS TO POWERLINE / UTILITY ASSOCIATIONS	132
